

Shengkai Zhao

Graphic Designer

Dear STELLEN DESIGN,

My name is Shengkai. I am a designer from China, specialized in visual communication. I started to create when I was four years old, drawing imaginative illustration. I believe that graphic design can help us find the beauty in life, and making simple yet thoughtful design has always been my mission.

I have been trained as a designer at California College of the Arts. In my schooling, I tried various forms of design projects that include traditional graphic design, interaction design, and human-centered design. I developed a lot of identity design knowledge. As a trained fine artist, I think identity design is functional art that combines design knowledge and artistic skills, which I have passion for. I have been trained to design packaging, and applying graphic art into the 3D world has always excited me.

All my experiences so far have all been driven by my keen interest in working at *STELLEN DESIGN*, and I look forward to contributing my skills and experiences to the designer position and hope to have the opportunity to speak with you further about the opportunity.

Sincerely,

Shengkai Zhao
